

High reliability – low maintenance -
fast format change – compact construction

Carton Closer

Packaging machine for automated closing of filled carton boxes

Carton Closer

The Econo-Pak Carton Closer handles filled boxes which are made of coated or uncoated carton or corrugated paper in different qualities. The carton boxes are closed by means of hot glue, hot air or tuck-in flap. After an in-depth consultation we are preparing a customized concept to evaluate which standard machine meets the customer's requirements. Different closing machines are available: Single-Flap, Straight-Line, Angle or High-Speed Carton Closer. Special customer requests are considered in the construction.

Available in different types and sizes:

EV Single-Flap Closer	single-flap design / 120 cartons per minute
GVE Straight-Line Closer	three-flap design / 100 cartons per minute
WVE Angle Closer	three-flap design / 100 cartons per minute
GVM Straight-Line Closer Lugless	three-flap design / 150 cartons per minute
HV High-Speed Closer	three-flap design / 250 cartons per minute

Format range: L= 70mm to 350mm / W= 70mm to 300mm / H= 20mm to 160mm

Additional formats are possible!

Our Carton Closers offer highest flexibility. Various closing options can be handled on the machines: one-flap closing, three-flap closing or tuck-in flap.
