The perfect solution for  
your cartons!

Forming tools by

 **ECONOPAK**  
THE PACKAGING COMPANY

# ECONOPAK

**Our forming tools offer standard solutions for all current erecting techniques**

- Standard locking (according to KLIKLOK)
- Pin locking (according to Sprinter)
- Hot-melt glue (dip finger- & glue nozzle application)
- Hot air
- Edge-wep
- Turn-over-end
- Special constructions (conical cartons, "round" corners, e.g.)

**We also provide tools for machines that were not manufactured by ECONO-PAK!**

## Forming tools by ECONOPAK

Our forming tools facilitate optimal appearance of your cartons. To achieve this, the tools are customized in order to accurately erect and form your cartons.

All forming tools are manufactured in stainless steel design. Where possible aluminum or plastic parts are used in order to reduce the weight. Individual tool inserts as well as divided carton-blank magazines that simplify the handling of the day-to-day operation are also available.
